ENVIRONMENT

The group recognises the importance of its environmental responsibilities, monitors its impact on the environment, and designs and implements policies to reduce any damage that might be caused by the group's activities. Initiatives designed to minimise the group's impact on the environment includes the safe disposal of waste and reducing energy consumption.

FUTURE DEVELOPMENTS

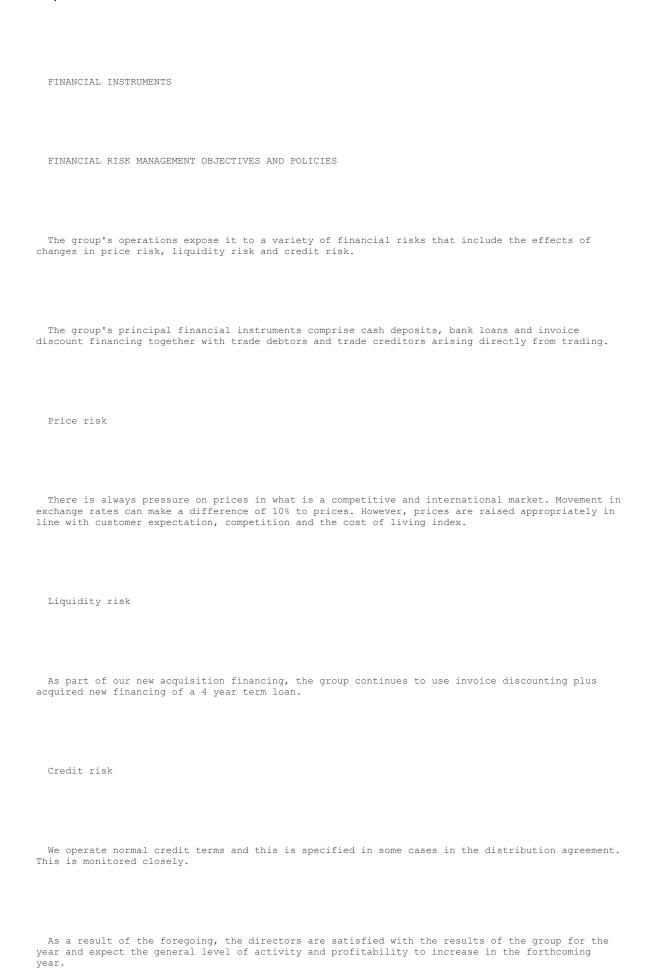

The group continues to develop its relationship with its key customers and support them with a flow of new products through our research and development efforts. Our business model of a global network is in place and requires support in the form of new products, keen prices and responsive services. The group continues to expand its global network with various strategic partners. This network has a value in itself and the more products that are passed through, the greater that value becomes.

PJO Industrial Limited has historically concentrated exclusively on the UK market. It is our intention to use our established network of overseas contacts to introduce PJO Industrial Limited's products, in particular the mining equipment, to that network and we would expect to see some increased activity during the second half of the year.

The first quarter of this year has been a period of consolidation following the acquisition of PJO Industrial Limited and PJO Group Limited and the subsequent costs of reorganisation, standardisation and integration in line with group standards has been undertaken. This will have some impact on the bottom line results. Second quarter performance should be unaffected by these issues, and we expect first half results to be in line with expectations.

RESULTS AND DIVIDENDS

The profit for the year, after taxation, amounted to GBP271,490. Particulars of dividends paid are detailed in note 10 to the financial statements.

RESEARCH AND DEVELOPMENT

The Mechan Controls PLC range of switches has more than trebled in the last 10 years. This has been achieved as a result of our extensive and intensive research and development efforts. We have now entered a period of product consolidation with a greater focus on pushing our existing products through our distribution pipeline.

Nirvana has developed two new products which are currently patented were ready by the second half of 2011. All new lines of potential development are investigated by the company in order to support its customer base. These new products will enhance our efforts to penetrate further into export markets.

PJO is continuing a programme to refine and develop its capital equipment. In particular they are responding to specific customer requirements, which include demand for low seam development including an overseas requests for low seam development also.
