Installation Guide for RDNK, RSSO, RSSR, RSSK & RSSG Safety Switches

Description:

The RSS series safety switches applies radio frequency identification technology (RFID) in a variety of housings.

The non-contact operation makes the RSS easy to install and tolerant to misalignment. They are individually coded for high security applications providing a simple more reliable solution to machine guard interlocking.

The RSSR and RSSG safety switches are designed to work with any safety relay on the market. Whereas the RDNK, RSSO and RSSK are designed to be connected to a safety control circuit which has less than 0.5 Amps inrush current.

The RSS series provides additional security with up to **4 billion unique codes** achieving type 4 high level coding according to EN 14119 safety standard.

These safety switches are available in 5 sizes, the RDNK, RSSO, RSSK, RSSR and RSSG and are rated to IP67 & IP69K for use in wet or dusty environments.

Switching Characteristics

The chart shows the switching points in millimetres

Mounting

The RSS range of safety switches can approach each other from most angles. When the guard is closed the targets on the printed face of the switch and actuator must be aligned.
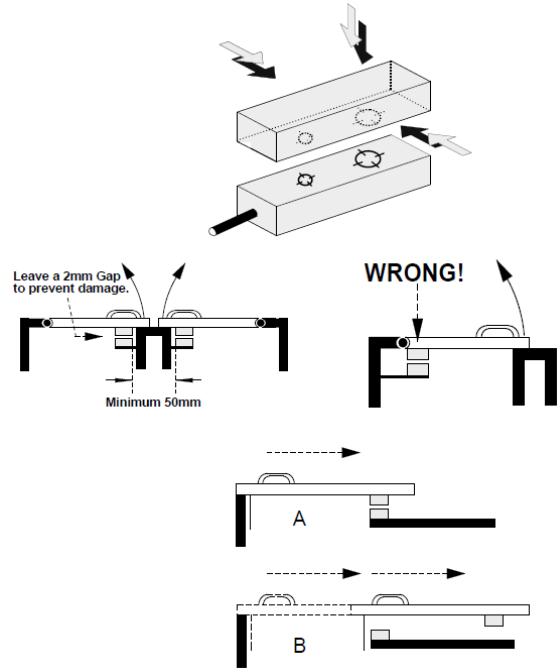

Mount the switch on to the machine frame and the actuator on to the opening edge of the door.

Use the tamper proof screws provided to make the installation more secure.

Do not use the safety switch as a door stop. Leave a minimum of 50 mm between any adjacent switches.

EN 14119
Provides some mounting suggestions, see example opposite.

Leave a 2mm Gap to prevent damage.

Minimum 50mm

The RSS are available with an IP69K, 6" (150mm), 8 pole 'Pig Tail' connector.
Connector specification: 8-pin, Micro Single Key-way, M12.

## Recommended Safety Control Unit

CONNECTION TO A SAFETY RELAY

The RSSR & RSSG non-contact safety switches are **designed to work with any safety relay on the market.**

The RDNK, RSSO and RSSK are **designed to be connected to a safety control circuit which has less than 0.5 Amps inrush current.**

All control contacts should be externally fused.

Recommended Safety Control Unit Mechan Part Number: SRL-1 24VAC/DC

IMPORTANT

Maintenance

It is recommended to check the safe operation of the switches and look for signs of damage or excessive wear on a weekly basis. Damaged units should be replaced or returned to the manufacturer for repair where practical.

Declaration of Conformity

Mechan Controls declares that the products shown conform to the Essential Health and Safety Requirements of the European Machinery Directive. The above products have been third party tested to conform to the requirements of EN-13849-1 and EN 62061. Full declaration of conformity can be downloaded from the Mechan Controls web site www.mechancontrols.co.uk or by contacting Mechan directly Tel: + 44 1695 722264
